

Daily cyber vulnerability scans

365 days / year

All public facing assets

Immediate alert

Criminals search every day over the entire internet for vulnerable assets to attack them. They can exploit more than 10,000 new vulnerabilities annually in standard software and operating systems. Sooner or later every asset is affected.

Over 10% of these annually new vulnerabilities are critical according to the industry standard CVSS. Critical vulnerabilities allow attackers, for example, to take over complete control of your system and cause considerable damage.

It is essential to know any day if your own systems are affected by critical vulnerabilities. In such cases, you need to act quickly and fix the vulnerabilities before they are exploited.

Our daily vulnerability scans by innoSec help you stay ahead of the attackers. You will be notified immediately if your assets are affected by critical vulnerabilities. In addition, you will receive all the technical details you need to quickly rectify this.

We check your assets for vulnerabilities every day

Daily checks of all your public facing assets, such as cloud solutions, firewall and proxy, web and mail server, VPN, DNS, SIP, IoT, home office, etc. by market-leading industry standard vulnerability scanners. Configuration errors, insufficient patch statuses, unsafe services, etc. can be detected. The weak points are classified, assessed and precisely described.

Forgotten systems that become vulnerable over time are a thing of the past. Just like forgotten patches and other preventable breaches that have already caused significant damage to many companies.

- ✓ Daily vulnerability scans of your public facing assets
- ✓ 100% coverage of your systems and continuous expansion possible
- ✓ Immediate notification of critical (CVSS) vulnerabilities
- ✓ Detailed information for eliminating the respective vulnerabilities
- ✓ In addition, monthly overview reports with all results
- ✓ No need to access your network
- ✓ Can be started immediately without integration
- ✓ 365 days subscription
- ✓ For industry and medium-sized businesses
